NOTHING IN IT.

The Journal has made no comments upon the rumored transfer of the Virginia and Truckee Railroad to the Central Pacific, because it has no idea that any credence was to be attached to it. Mr. Mills may be "shrewd," "sensible" and all that, but if he is half the hibition of the agricultural products of man his friends claim for him, he can make more out of the property by un- highest usefulness of which it is capaloading it on the New Yorkers than he | ble, its different divisions must be encan by selling to the Central. And in larged and others be added. view of the fact that whatever money he is out on it has been returned to him twice over, and the road is clearing half a million a year even in these dull times, he would be rather foolish to sell it to anybody.

LETTER FROM CONGRESSMAN

The Artesian Well Bill-The Ren-

Governor Kinkead wrote to Mr. Daggett, suggesting that, in his opinion, it would be better, if possible, to arrange to have the State manage its own artesian well business, if the Government would make the necessary appropriation of lands, to which Mr. Daggett replies,

You are right about the artesian well business. I think the school land exchange will be made. I am pressing it vigorously before the Land Committee, State can sell its land through offering inducements similar to those of the contemplated artesian project by Congress. Under the circumstances, I shall not introduce the Artesian bill this session, at least not until I can see what can be done with the other bill. I have written to this effect to General Hatch, and as the report has gone forth that I have an Artesian bill in preparation, I would be glad if you won d see that the people of Nevada are apprised of the reason why its introduction has been deferred. The Reagan bill is not dead—not by a great Through railroad influence the majority of the Committee on Commerce has been induced to report a sutstitute bill, but I do not believe it can be put through the House. The original purpose was to make no report at all after this strange change had been wrought in the committee; but the public pressure became so great, and charges of illegitimate influence with the committee were so openly hinted at 4n Congress and emphatically made by such set the newspapers as were not in railfield pay, that the committee have finally consented to report all the rail-road bills back to the House on the fourth Wednesday in March. This will open the three of them to discussionjust what the railroad people do not want. It will be our purpose to secure a substitution of the Reagan bill for the one reported by the najority of the committee. And right there the fight single phrase, the Commissioner says: will be made. And it will be a warm. The department needs opportunity one. I think we will be able to defeat the majority bill. I should not be surburse to the country an hundred fold prised if the Riot Act should be read any appropriation made to it.

In conclusion, the Commissioner says.

If Congress, animated with a same of

NEEDS OF THE AGRICULTU-BAL DEPARTMENT.

Commissioner Le Duc, of the Department of Agriculture, has forwarded to Representative Le Fevre, chairman of the sub-committee of the House Committee on Agriculture, a long communication in response to the request of the committee for a statement of the wants of the Department. The Commissioner is very certain that the wants

of the department are many and urgent. First-A suitable building is imperatively needed for the accommodation of the employes, for the storage and handling of seeds and for the continuous expartment may even approximate to the

The Commissioner devotes considerable space to this subject, and instances the question of sugar and the tests which have been made by the department with the sorghum inice, leading to a wide-spread interest in the subject, which has resulted in preparations for planting tens of thousands more acres of sorghum this year than last. When it is considered that since 1840 this country has consumed about \$1,800,-000,000 worth of imported sugar and allied products, or \$100,000,000 more than the combined gold and silver products and should the bill become a law, the of the mines of California and the Western States and Territories during the same period, it will readily be seen what an immense gain would inevitably flow from the general and extended cultivation of sorghum and like plants. The other divisions of the department statistics, entomology, botany, seeds and microscopy, are described in detail, and the work performed in each division, and the possibility of each for increased usefulness under more favorable conditions. On the subject of seeds the Commissioner says:

However opinions may have differed hereiofors it is now generally conceded that the distribution of seeds from this department is doing incalculable good. As the result of the distribution of wheat and outs the increase for the past three years of wheat as compared with an immense gain would inevitably flow

The Lumber Trade.

We lately published an extract from the Truckee Republican which may have led some of our lumbermen on the Truckee to imagine that the Carson and Tahos Lumber and Fluming Co. or as that paper expressed it, the concern of Yerington, Bliss & Co. were not prepared to supply the Virginia or other markets. In order that parties engaged in the lumber business may not be misled, we will state, on the authority of a gentleman who knows whereof he speaks, that the Carson and and a half million feet of logs, and have let logging contracts for the present year, amounting to twenty million feet, and are only holding back on other contracts to await the result of developments on the Comstock. They also have on hand in their Carson yard over fifteen million feet of dry timber and lumber, and are fully as well prepared this year as they ever have been to supply the mines with all the lumber needed for the present and coming season.
